

What to expect

DURING YOUR VISIT, THE DOCTOR MAY ASK YOU SOME QUESTIONS SUCH AS:

- When did your acne start?
- Are you aware of any triggers (these are things that make your acne worse such as stress)?
- What treatments (pills or creams) are you taking, if any?
- What is your current skin care routine? For example, which cleanser, moisturiser and/or sunscreen do you use?
- What treatments have you tried to far?
- How long did you take them for?
